**EasyWay** 

**WORKSHOP  
SECURE PARKING**  
28-29 September  
Autoparco Brescia Est

## PROGRAM

The Workshop on Secure Parking held in the framework of the EasyWay project is likely to become an important instrument to foster the international cooperation in creating the European Network of Secure Truck Parks. To be noted that this action is a priority of the ITS Directive and consequently appears as a crucial mean in reaching the Union's goals of safety, mobility and economic growth.

The Workshop offers an opportunity of debate involving policymaking institutions, road operators, professional hauliers, insurers.

It brings together the main freight-related EU initiatives and organizations, favouring the exchange of ideas and experiences, leading to the establishment of a common vision and outlining further steps.

Three main strategic objectives are identified:

- support the EC action in creating recommendations regarding secure parking places for trucks and commercial vehicles, telematics-controlled parking and reservation systems within the ITS Action Plan, including the EasyWay Deployment Guidelines;
- examine the strategies to be deployed in order that public and private sectors can work together creating high quality security and information services;
- face the building of a European network of intelligent secure truck parks which would help to reduce the huge social costs of freight crime with the support of the insurance industry.

THE WORKSHOP WILL BE IN ENGLISH

Day 1 (Moderator: R.Arditi/SINA)		Day 2 (Moderator: D.Herenda/EasyWay Chairman)	
10:00	<b>Registration and Welcome Coffee</b>	17:30	<b>Closure Day 1</b>
